

HELPING YOUR CUSTOMERS

Recover, Redeploy & Retire Remote Technology

A simple nationwide program for recovering, redeploying, Trade-In, or securely retiring company-owned technology.

Whether employees are working remotely, leaving the organization, or receiving new equipment, recovering company-owned technology has become increasingly difficult. AnythingIT helps resellers deliver a secure nationwide recovery program that reduces risk, improves accountability, and recovers asset value.

Remote Workforce

- Employees work everywhere.
- Recovering company-owned technology has become increasingly difficult.

Asset Accountability

- Deployed is governed.
- Retirement deserves the same level of accountability.

Technology Refresh

- New technology is deployed before legacy equipment is recovered.
- Maintain visibility throughout every refresh.

Employee Offboarding

- Company equipment is often forgotten during employee departures.
- Standardized recovery improves accountability.

REQUEST

SHIP KIT
